

Latest Version of Low-Voltage Optical Cable Construction Standards

Overview

On the 22nd of July 2025, the European Commission published the Commission Implementing Decision 2025/1488, which amends the Implementing Decision 2023/2723 to published harmonized standards for flat flexible cables and charging cables for electric vehicles. These standards, published by organizations like TIA, BICSI. Low-voltage electrical installations - Part 1: Fundamental principles, assessment of general characteristics, and definitions IEC 60364-1:2025 defines the scope and objective of the IEC 60364 series and specifies the fundamental safety requirements for an electrical installation. This document. Recommendation ITU-T L. 109 describes cable construction and provides guidance for the use of optical/metallic hybrid cables, which contains both optical fibres and metallic wires for telecommunication and/or power feeding. Leviton's communications cables (both optical and copper cables) for structured wiring installations in buildings are all "CE" marked under the CPR. For a tender writer, a procurement engineer, or anyone signing off on factory acceptance, the practical question.
