

Latest version of the cabling and fiber optic cable price list

Article Overview

Fiber optic cable prices in 2026 range from \$0.09 to \$6 per foot depending on type, strand count, jacket, and installation requirements.

Fiber Optic Cable Pricing

Single-mode fiber (OS2): Typically costs \$0.09 to \$1.52 per foot for wholesale bulk purchases, with retail prices ranging from \$1 to \$6 per foot depending on fiber count and quality . Single-mode is ideal for long-distance transmission and backbone networks. Multimode fiber (OM3/OM4): Costs are higher due to wider cores and manufacturing complexity, ranging from \$1.50 to \$6 per foot . Multimode is commonly used in high-speed data centers and short-distance applications. Armored cables: For protection against physical damage, armored cables cost \$0.50 to \$6.50 per foot, depending on construction and materials . These are suitable for outdoor, underground, or high-risk environments. Pre-terminated or factory-terminated cables: These assemblies are more expensive upfront (20–30% higher) but reduce on-site labor costs significantly, potentially lowering total project costs by up to 70% . High strand-count cables: A 12-strand cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1 per foot. Large backbone cables, such as 288-strand, can cost \$6 per foot or more .
