

List of Tools for Fiber Optic Cable Installation

Article Overview

Fiber optic installation requires specialized tools for cutting, stripping, splicing, testing, and cleaning to ensure reliable network performance.

Cable Preparation Tools

- **Fiber Optic Strippers:** Used to remove protective coatings and buffer layers from optical fibers without damaging the glass core, essential for preparing fibers for termination or splicing .
- **Kevlar Cutters:** Designed to cut Kevlar yarn inside fiber cables cleanly, which regular scissors cannot handle .
- **Cable Jacket Strippers:** Remove the outer jacket of fiber optic cables safely, often with rotary or slitting designs for different cable diameters .

Splicing and Termination Tools

- **Fusion Splicers:** Join fiber strands permanently with minimal signal loss using an electric arc. Modern splicers include automated alignment, touchscreen controls, and splice record storage .
- **Mechanical Splice Kits:** Provide temporary or semi-permanent fiber connections when fusion splicing is not feasible .
- **Fiber Cleavers:** Ensure a precise, flat cut on fiber ends before splicing, critical for low-loss connections .
- **Splice Sleeves and Sleeve Heaters:** Protect and reinforce the spliced fiber, ensurin...
