

List of auxiliary materials for the complete distribution box

Article Overview

A complete distribution box requires enclosures, circuit protection devices, wiring accessories, connectors, relays, and optional monitoring or auxiliary modules to ensure safe and efficient power distribution.

Core Enclosure Materials

- **Metal Enclosures:** Stainless steel or galvanized steel for industrial or outdoor use, offering high impact resistance and corrosion protection .
- **Plastic Enclosures:** Polycarbonate (PC), Acrylonitrile Styrene Acrylate (ASA), or fiberglass-reinforced plastics for residential or light-duty applications, providing lightweight, shatter-resistant protection .
- **Fire-Resistant Materials:** Non-combustible materials to prevent fire hazards from electrical faults .

Electrical Components

- **Circuit Breakers (MCBs):** Protect circuits from overloads and short circuits .
- **Residual Current Circuit Breakers (RCCBs):** Detect imbalances between phase conductors for enhanced safety .
- **Isolators:** Manual switches to isolate circuits for maintenance .
- **Fuses:** Provide overcurrent protection in auxiliary circuits .
- **Bus Bars:** Copper or aluminum bars for distributing power to multiple circuits
