

# Madagascar Fiber Optic Logging Cable Model List

## Article Overview

Optical fiber logging cables in Madagascar include high-strength, high-temperature, and multimode/single-mode cables designed for well logging and high-speed data transmission.

### Overview of Fiber Optic Logging Cables

Fiber optic logging cables are specialized cables used in oil and gas well logging to transmit real-time data from instruments lowered into wellbores. They are designed to withstand high temperatures, pressures, and harsh chemical environments, providing high-speed, high-bandwidth data transmission over long distances. These cables are lighter, safer, and less prone to electromagnetic interference compared to traditional wireline cables, making them ideal for petrophysics, geomechanics, and fluid analysis operations .

### Key Models and Types Available in Madagascar

- Smooth-Surfaced Fiber Optic Logging Cable
  - Features a tube with a smooth outer surface and an inner core containing fiber optics and electrical conductors.
  - Designed to allow thermal expansion and maintain integrity under high-pressure conditions.
  - Suitable for deep well logging applications .
- OM3 Multimode Fiber Optic Cable (6 Fibers, 50/125μm)...
