

Making elbows in T-junction cable trays

Overview

You can create a fitting to join two connectors (at end of cable tray) by calling the Revit. Whether you are a DIY enthusiast, electrician, or metalworker, this tutorial will help you create cable tray elbows like a pro. ☐☐ Topics Covered: Tools for cable tray elbow making. Here is the simple solution Create two type : 90 elbow and 45 elbow In the real world, to make a 45 elbow, we need two segments, to make a 90 elbow, we need three segments I've also tried to use some geometry forms in revit but no hope. Determine the angle and required radius size of the elbow, and choose the appropriate elbow type based on these parameters, such as 90 degree elbow, 45 degree elbow, etc. When a wire cable tray is cut, the fact that a. In order to automatically create a whole cable tray run, however, we need both the straight segment cable tray elements and also the fittings to connect them with each other, elbows to turn corners and branching elements to represent junctions.
