

Malaysia Fiber Optic Cable Splicing Plant

Article Overview

Malaysia hosts several advanced fiber optic cable splicing plants and service providers offering manufacturing, splicing, testing, and network deployment solutions.

Key Fiber Optic Splicing Facilities and Services

Hexstar Group operates a 7-acre fiber optic manufacturing plant in Malaysia, certified with ISO 9001:2015 and ISO 14001:2015, producing over 20,000 km of fiber optic cables annually. The facility includes a fully equipped and certified product testing laboratory for comprehensive cable testing, and it also manufactures cable accessories to support splicing and network deployment . MIP Equipment Sdn Bhd provides technical support and training for fiber optic splicing using Sumitomo splicing machines and optical test instruments like OTDRs and power meters. They actively assist main contractors and sub-contractors in performing splicing, testing, and troubleshooting for Telekom Malaysia and other telcos . Binasat Communications Berhad offers end-to-end fiber network engineering services, including outside plant (OSP) splicing, civil works, and internal structured cabling (ISP). Their teams handle high-capacity fiber installations, precise splicing, and customer premises equipment (CPE) setup, ensuring reliable connectivity for Metro Ethernet, ISDN, and other services . ETLSS specializes in on-site fiber optic splicing and testing, including fusion splicing, in-service “hot cuts,” and emergency restoration. Their technicians deploy extensive fiber networks tailored to client requirements, covering FTTH, FTTR, and FTTA systems . Aztel Corporation supplies fiber optic test gears and splicing machines, supporting the technical needs of splicing plants and contractors across Malaysia
