

Manufacturer of Integrated Power Testing Systems for the European Union

Overview

At MTE, we combine Swiss precision with German engineering to develop high-performance equipment tailored to today's requirements in the global energy and e-mobility markets. With our team of expert trainers worldwide, you can refresh and expand your knowledge of power system testing in various hands-on and theoretical training courses of the OMICRON Academy. Get the most out of your test equipment and choose from our extensive offering of webinars, classroom and online.

ActionPower's testing equipment is proven by industrial leaders including BYD as EV manufacturer and CATL who is a prominent company of EV Battery and ESS.

ActionPower promotes the cleaner energy generation by verifying and testing devices throughout a PV system. From Meter Testing and Power Quality Analysis to Transformer Monitoring Systems or Test & Calibration Equipment for EV. Laboratory which makes it possible to carry out more than 300 types of electrical tests (power, high voltage, LV, MV, power electronics and environmental tests), ISO, UL, ASTM, CEN, NF, IEC and UNE tests. The large touchscreen display indicates all relevant output quantities simultaneously. System behaviour and ageing are observed using different tests performed by SERMA Energy: Our various test benches are coupled to.
