

Manufacturer s 800G Optical Module SFP

Overview

Lumentum's 800G 2xDR4 OSFP transceiver provides high-speed, energy-efficient optical connectivity for AI and cloud data centers. 25 Gbps PAM4 per lane, achieving a total bandwidth of 800 Gbps over. FS provides an expanding portfolio of 800G OSFP/QSFP-DD solutions featuring high-performance, high-bandwidth, and backward compatibility. It boasts the extraordinary ability to process 8 billion bits per second, more than doubling the. Manufactured in our class-100k dust-free workshops in Wuhan, we bring you direct-from-factory pricing without compromising on rigorous quality control. Engineered for enterprise networks and access layer applications. The optical signals back into electrical signals. Optical modules are classified by their packaging forms, with common types including SFP, SFP+, SFP28, QSFP+, QSFP28, QSFP56, QSFP-DD, QSFP112, and. The Cisco ® OSFP 800G transceiver modules provide 800 Gigabit Ethernet (GE), 2x 400GE, 4x 200GE, and 8x 100GE connectivity options, complying with the Octal Small Form Factor Pluggable (OSFP) MSA for pluggable transceivers. The modules comply with the OSFP MSA configuration with integrated closed. Factory-direct optical transceivers and high-speed cables, from legacy links to 1.6T, built to deploy faster, scale cleaner, and stay compatible as your network evolves. At scale, the biggest problems come from what you don't control, not what you deploy. OEM firmware updates silently break.
