

Mexican cable tray production

Article Overview

Mexico's cable tray market is growing steadily, driven by domestic manufacturing, industrial expansion, and infrastructure development, with projected CAGR above 11% through 2031.

Market Overview

The cable tray industry in Mexico is a critical component of the country's industrial and construction infrastructure, providing organized pathways for power and data cabling across sectors such as energy, manufacturing, telecommunications, and commercial construction . Domestic production is robust, complemented by strategic imports, and the market is influenced by national infrastructure projects, foreign direct investment, and industrial modernization initiatives .

Production and Materials

Cable trays in Mexico are produced in both metallic and nonmetallic forms. Nonmetallic cable trays, valued for corrosion resistance, lightweight design, and ease of installation, have seen consistent growth, with the market projected to reach USD 5.54 billion by 2033 at a CAGR of 7.1% . Metallic trays dominate industrial and high-load applications, while engineered systems are increasingly used in commercial buildings, data centers, and logistics hubs . Modern production emphasizes durability, fire safety, corrosion resistance, and compatibility with digital design tools like BIM .
