

Mexico Customs Clearance Passive Optical Network QSFP-DD

Article Overview

Importing QSFP-DD PON equipment into Mexico requires compliance with Mexican customs regulations, proper documentation, and registration with the Official Register of Importers, while ensuring the modules meet technical standards for high-speed optical networking.

QSFP-DD Overview for PON Applications

QSFP-DD (Quad Small Form-Factor Pluggable Double Density) modules are high-speed optical transceivers designed for data center and telecom networks, supporting 400G, 800G, and up to 1.6T per port with backward compatibility to legacy QSFP modules (). They feature an eight-lane electrical interface and support multiple media types, including passive optical cables, multimode fiber (MMF), and single-mode fiber (SMF), making them suitable for Passive Optical Network (PON) deployments (). QSFP-DD transceivers are optimized for thermal management, high port density, and signal integrity, which is critical for high-bandwidth PON systems ().

Mexican Import Requirements

To import QSFP-DD PON equipment into Mexico, the following steps and documentation are required ():

- **Importer Registration:** The Mexican importer must be registered in the Official Register of Importers (Padrón de Importadores) maintained by the Secretaría de Hacienda y Crédito Público (SHCP). For electronics, the importer may also need to b...
