

Multimode fiber optic patch cord MPO-FC self-operated

Article Overview

A multimode MPO-FC fiber optic patch cord combines high-density MPO connectivity with reliable FC terminations, ideal for short-reach, high-bandwidth applications in data centers and enterprise networks.

Overview

A multimode MPO-FC patch cord is a fiber optic cable terminated with an MPO connector on one end and an FC connector on the other. The MPO (Multi-Fiber Push-On) connector consolidates multiple fibers—commonly 8, 12, 16, or 24—into a single compact interface, enabling high-density connections and reducing cabling bulk, installation time, and error rates. The FC (Ferrule Connector) end provides a screw-type, stable connection, often used in industrial or telecom equipment requiring secure, low-loss terminations.

Fiber Type and Applications

- Multimode Fiber (OM3/OM4/OM5): Designed for short-reach, high-speed applications. OM4 supports distances up to 150 meters for 100G SR4, while OM5 is optimized for short-wave division multiplexing (SWDM).
- Use Cases: Data center backbones, intra-rack connections, 40G/100G/400G Ethernet, 5G fronthaul/backhaul, and FTTH networks.
