

Near the electrical distribution box in the building

Article Overview

The electrical distribution box is typically a rectangular metal panel located in a basement, utility room, garage, or near the exterior wall close to the electrical meter.

Typical Locations

In most buildings, the main electrical panel or distribution box is found in areas that are easily accessible and near the point where electricity enters the building.

Common locations include:

- Basement or utility room for indoor access
- Garage for convenient maintenance
- Exterior wall near the electric meter to allow utility access and emergency shutoff
- Side or rear of the building depending on local building codes and transformer placement

Identifying the Panel

The distribution box is usually a rectangular gray metal box, roughly the size of a medicine cabinet, with a cover that may blend into the wall. Inside, it contains circuit breakers or fuses that control electricity to different circuits in the building . Main panels control power to the entire building, while sub-panels may serve specific areas or floors....
