

Network Rack Size and Price List

Article Overview

Standard network racks are typically 19 inches wide, with heights from 12U to 48U and depths ranging from 24 to 48 inches, with prices varying from around \$150 to over \$1,000 depending on size and features.

Standard Dimensions

- Width: Most racks follow the 19-inch industry standard (distance between mounting rails) to accommodate servers, switches, and patch panels .
- Height: Measured in rack units (U), where 1U = 1.75 inches. Common heights include 12U, 24U, 36U, 42U, and 48U. A 42U rack provides 73.5 inches of usable vertical space .
- Depth: Varies based on equipment and airflow needs. Typical depths range from 24 inches (600 mm) to 48 inches (1200 mm). Shallow racks (24-30 inches) are suitable for switches and patch panels, while deeper racks (36-48 inches) are recommended for servers and UPS units .

Types of Racks

- Wall-Mounted Racks: Compact, usually 12U-24U, ideal for small offices or network closets. Depths commonly 18-35 inches .
- Floor-Standing Racks: Larger, 24U-48U, suitable for data centers. Can support heavy equipment and allow better airflow and cable management .
- Portable or Under-Desk Racks: Smaller, mobile racks for home labs or temporary setups, often 12U with 24-35 inch depth
