

New Energy Peru

Overview

New Energy Peru is a local renewable energy project developer with international backing. The National Energy Plan foresees a 20% share of wind and solar power by 2030, to complement the 50% hydropower share. This interactive chart shows the average energy consumption per person each year. These figures reflect energy consumption — that is the sum of all energy uses including electricity, transport and heating. Many people assume energy and electricity to mean the same, but electricity is just one. Peru's energy sector is undergoing a major transformation as it seeks to: As of 2023, Peru's energy mix consists of: Peru aims to produce 32% of its energy using renewable sources by 2030. This makes it a promising market for investment and export opportunities in: A portfolio of 31 hydropower.
