

North Korean cable tray standards

Article Overview

North Korean cable trays are manufactured to meet industrial norms, emphasizing durability, reliability, and long operating life, with types and materials comparable to international standards.

Overview

Cable trays in North Korea are produced by specialized manufacturers such as Cable House, which focus on providing a comprehensive range of products for industrial, commercial, and utility applications . These trays are designed to support electrical cables efficiently while ensuring safety, durability, and long-term performance. The manufacturing process uses graded raw materials and modern technologies to meet prescribed industry norms, ensuring reliable operation over years .

Types and Materials

North Korean cable trays include common types found globally, such as:

- Ladder trays: Ideal for heavy power cables and long horizontal runs, providing strong support and ventilation.
- Perforated trays: Used for power and instrumentation cables, allowing airflow to prevent overheating.
- Solid bottom trays: Protect cables from dust and electromagnetic interference, suitable for control and data cables.
- Basket trays: Common in IT and data centers for routing multiple communication cables....
