

Norwegian tariff cost ADSS optical cable G 652D

Article Overview

The cost of ADSS optical cable using G.652D fiber in Norway typically ranges from \$0.25–\$1.20 per meter depending on fiber count, span length, and cable specifications, with market trends showing rising prices due to global demand.

Pricing Overview

ADSS (All-Dielectric Self-Supporting) cables are priced based on fiber core count, span length, mechanical strength, and sheath type. For example, a 12-core ADSS cable for short spans (≤ 100 meters) may cost around \$0.25–\$0.35 per meter, while a 48-core cable for long spans (≥ 500 meters) with reinforced aramid yarn and tracking-resistant outer jacket can reach \$0.90–\$1.20 per meter. The choice of G.652D fiber is standard for aerial installations and is generally more cost-effective than bend-insensitive fibers like G.657A2.

Factors Affecting Cost

- Fiber Core Count: More cores increase material and production costs.
- Cable Span and Mechanical Strength: Longer spans require reinforced structures, adding 20–30% to the cost for spans over 300 meters.
- Sheath Type: Anti-tracking (AT) sheaths are more expensive than standard polyethylene (PE) due to higher resistance to environmental and electrical stresses.
- Environmental Conditions: UV exposure, temperature extremes, and high-voltage lines can increase cable specifications and cost.
- Global Market Trends: G.652D fiber prices are rising in 2025–2026 due to increase...
