

One pack of fiber optic pigtails

Article Overview

Fiber optic pigtails are short fiber cables with connectors on one end, used for splicing and connecting fibers in network installations.

Fiber optic pigtails are essential for connecting fibers to network components and are commonly used in FTTH installations, data centers, and telecom networks. They come in singlemode (OS2) and multimode (OM3/OM4) variants and are available with various connector types such as LC, SC, ST, and E2000 . Pigtails typically feature a secondary coating that can be easily stripped for splicing .

Pack Options

- Individual pigtails: You can purchase a single pigtail if you only need one for a specific connection .
- Set packs: Commonly sold in packs of 12, often in assorted colors to help with fiber identification. These sets usually include protective shrink sleeves for fusion splicing .

Key Features

- Low insertion loss and return loss: Ensures high-quality signal transmission .
- Flexible connector types: LC, SC, ST, and E2000 connectors are available to match your network requirements .
- Compatibility: Suitable for mechanical or fusion splicing applications .
- Custom lengths and configurations: Some suppliers offer custom-made pigtails for specific installation needs
