

Optical Communication Product Manufacturers

Article Overview

Leading suppliers of optical communication products include Coherent Corp., Corning, Lumentum, Source Photonics, Acacia Communications, and Molex, offering solutions for data centers, telecom networks, and industrial applications.

Key Global Suppliers

Coherent Corp. (formerly II-VI Incorporated) is a major provider of optical components and transceivers, supporting high-speed communication networks, cloud infrastructure, and AI-driven data centers. They focus on integrated optics and silicon photonics to enhance transmission capacity and energy efficiency. Corning offers OEM optical solutions, including specialty fiber, wavelength management, variable optical attenuators, fiber arrays, couplers, and splitters. Their products are widely used in LAN and data center applications, supporting next-generation optical networks up to 400G and beyond. Lumentum Operations LLC designs and manufactures high-speed optical transceivers and photonic products for 400G and 800G data rates, targeting data centers and cloud infrastructure. Their innovations in coherent optics and integrated laser technology make them a key player in next-generation optical networking. Source Photonics, based in Los Angeles, specializes in optical transceivers and data connectivity solutions for data centers, broadband, and optical transmission. They provide products supporting GPON, NG-PON, and high-speed data rates up to 800Gb/s, with a global presence in China, Taiwan, and the United States. Acacia Communications develops coherent optical modules and networking equipment for cloud providers and network operators. Their expertise in...
