

Optical Module Manufacturer Direct Sales Brand

Article Overview

Direct sales from optical module manufacturers offer cost savings, faster delivery, and enhanced technical support by eliminating intermediaries.

Benefits of Manufacturer Direct Sales

Purchasing optical modules directly from manufacturers provides several advantages over traditional distribution channels. Direct supply reduces costs by removing agents and distributors, ensures better product quality and authenticity, and improves supply chain stability, especially during global shortages. Manufacturers can respond more quickly to technical specifications, application scenarios, and future project plans, enabling faster product development and reduced introduction cycles. Direct sales also allow for priority access to raw materials and closer collaboration on custom solutions for high-speed data center or telecom applications .

Leading Optical Module Manufacturers Offering Direct Sales

Several manufacturers provide direct sales and factory support for optical modules:

- **LSOLINK:** Offers a fully automated production line with a daily output of 30,000 units. They provide factory direct sales, custom hardware solutions, chip selection, and support for 400G/800G optical transceivers, DAC/AOC cables, and AI data center hardware. Orders are shipped quickly, with 80% produced and shipped the same day, and 24/7 technical support is available
