

Optical-electric composite cable power supply splitter

Overview

Rugged hybrid multi-channel cable assembly consisting of power wires (240V AC / 16A / 2.5mm²) and fiber lines (up to 12 channels). Huawei OptiXaccess S1016-L power module is to provide data transmission and remote power supply for terminals by connecting to photoelectric composite cables. It is applicable to indoor scenarios where terminals such as ONUs, APs, and cameras are difficult to obtain power supply. Perfect solution for harsh environments and mobile applications requiring both AC power and multiple fiber strands. Need help?

FTTR on-site Photoelectric Composite Cable is a hybrid cable of integrated optical fiber and electrical copper wire; applicable for indoor tube conduct wiring, on-site optical fiber connection and electrical transmission, aims for data transmission and remote equipment electricity supply.
