

Outdoor Cabinet

Article Overview

Outdoor cabinets are robust, weather-resistant enclosures designed to protect equipment from environmental hazards while providing secure, organized, and ventilated storage.

Materials and Construction

Outdoor cabinets are typically constructed from stainless steel, galvanized sheet, or aluminum, offering long-term durability and resistance to corrosion, impacts, and extreme weather conditions . Many cabinets feature double-walled construction to maintain internal temperatures and provide additional protection against vandalism . Powder-coated finishes or marine-grade stainless steel (304 or 316) are common for enhanced corrosion resistance .

Dimensions and Modularity

Cabinets are available in incremental widths of 3 inches, with standard heights starting at 12 inches and depths ranging from 24" to 28" depending on the model . Modular designs allow for customization and scalability, supporting additional devices or expansion of network infrastructure . Adjustable shelves, full-extension drawers, and pre-cut access holes for plumbing, electrical, and ventilation are standard features .

Environmental Protection

Outdoor cabinets are designed to meet IP65/IP66 standards, ensuring protection ag...
