

Outdoor protection level distribution box

Overview

Protection level: IP66, ensuring that the distribution box is effectively waterproof and dustproof in harsh outdoor environments. (3). The Waterproof Electrical Distribution Box, with its high-definition transparent cover, is a transparent panel that not only allows for easy monitoring of the internal components, but also enhances the overall aesthetics, making it perfectly suited for functional applications. Stainless-steel material combined with an IP33 protection level and severe outdoor environmental uses render the box highly. Weatherproof outdoor distribution boxes ensure reliable power distribution in challenging environments by protecting against moisture, dust, and temperature extremes. Key design points include high-quality materials like ABS plastic, aluminum, and stainless steel that resist corrosion and UV. SMICO's IP65 protection rating is one of the common protection rating standards for outdoor plastic distribution boxes.
