

Outdoor signal optical cable model

Article Overview

Common outdoor optical cable models include GYXTW, GYTA, GYTY53, GYTA53, GYFTY, GYTC8S, ADSS, and GYTS, each designed for specific environmental and installation conditions.

Key Outdoor Optical Cable Models and Features

- GYXTW: Metal-reinforced, central tube filling type with steel-polyethylene bonded sheath; suitable for pipeline and overhead laying .
- GYXTW53: Similar to GYXTW but armored with longitudinally wrapped corrugated steel tape; ideal for direct buried installations .
- GYTA: Metal-strengthened, loose tube layer stranded filling type with aluminum-polyethylene bonded sheath; used in pipelines and overhead applications .
- GYTY53: Metal-strengthened, loose tube stranded filling type with polyethylene sheath and corrugated steel tape armor; designed for direct burial in harsh environments .
- GYTA53: Loose tube stranded filling type with aluminum-polyethylene bonded sheath and steel tape armor; suitable for direct buried applications .
- GYFTY: Non-metallic reinforcing member, loose tube stranded filling type with polyethylene sheath; ideal for areas with strong electromagnetic interference .
- GYTC8S: Central tube filling type, 8-shaped self-supporting cable with steel-polyethylene bonded sheath; used for self-supporting overhead installations .
- ADSS (All-Dielectric Self-Supporting): Non-metallic, self-supporting cable for aerial installations without external support .
- GYTS: Steel tape armored cable for enhanced mechanical strength and support in duct or aerial applications
