

Power outage at Argentina s electrical distribution box

Overview

More than 600,000 people were left without electricity Wednesday as massive power outage hits Buenos Aires and its southern suburbs – even the Casa Rosada was affected. 2 million residents without electricity. According to local media, the Argentine government attributed the blackout to Edesur, a subsidiary of Enel responsible for energy distribution in the country, while suspicions. Increased power cuts and blackouts in Argentina impact the industry, economy, social and environmental conditions. There are several factors that drive the increase in power cuts including aging infrastructure, imbalanced supply and demand, and lack of energy storage systems. The industry and. A significant power outage struck the Buenos Aires Metropolitan Area (AMBA) on Wednesday, January 15, 2026, leaving nearly one million people without electricity. The incident, which occurred around 2:45 PM local time, was attributed to a technical failure at a transformer substation in Morón. The lights — and air conditioning — went out at the Casa Rosada on Wednesday afternoon as swaths of Buenos Aires City were hit with a power outage in 30°C heat. The energy distribution company Edesur suffered two massive power failures in a day, halting trains and the subway as well as leaving. Argentina faced a sweeping electrical outage after a series of faults hit the national grid, bringing parts of the country to a standstill and touching the capital, Buenos Aires. Officials from the Ministry of Energy reported that multiple faults disrupted the interconnected system, triggering a.
