

Preliminary Preparations for Optical Cable Engineering

Overview

Sections are included for project management; cable handling, testing and equipment; overhead cable placement; underground cable placement; underground enclosures; bonding and grounding; cable preparation and connectorization; splicing; and activation and testing. 01 This procedure provides general information for the installation of Prysmian fiber optic cables in direct buried applications. The methods described are intended for guideline use only, as it is impossible to cover all the various conditions that may arise during an installation. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. FO-CS JOINT USE CLIMBING SPACE REQUIREMENTS 51. APPENDIX A - COVER SHEET / TOC 52. CHECK. lled for in your company's safety proced s and, if necessary, lineman's rubber gloves. Use the leather gloves when climbing or descending a pole, and w en working with sharp instruments or materials. A body belt and safety strap for.
