

Price Trends of Multimode 10 Gigabit Optical Modules

Article Overview

Multimode 10G SFP+ optical modules typically range from \$10 to \$300 per module, depending on brand, fiber type, and transmission distance.

Typical Pricing

The average price for 10G multimode SFP+ modules generally falls between \$10 and \$300. Modules designed for short-range connections (up to 300–400 meters using OM3 or OM4 fiber) are usually at the lower end of this range, while branded or higher-performance modules may cost more due to quality, vendor support, and compatibility requirements (L-P.com) . For example:

- Standard SR multimode modules for distances up to 300 m (OM3) or 400 m (OM4) are commonly priced around \$20–\$50 per module (FS.com, Ubiquiti Store) .
- Bulk packs (e.g., 10-pack 10GBase-SR multimode modules) can offer cost savings, with per-unit prices often in the \$15–\$40 range depending on vendor and fiber compatibility (Amazon) .
- Premium branded modules from Cisco, HP, or Brocade may reach \$200–\$300 per module due to vendor licensing, higher reliability, and extended support (CablesOnDemand) .

Factors Affecting Price

- Fiber Type: OM3 modules (up to 300 m) are cheaper than OM4 modules (up to 400 m) due to higher performance and lower attenuation in OM4 fiber....
