

Price of Automatic Wire Cutting Machine for Optical Fiber Cables

Article Overview

Automatic fiber optic cable cutting machines typically range from \$3,000 to \$15,000, depending on features, automation level, and production capacity.

Price Overview

The cost of an automatic wire cutting machine for optical fiber cables varies widely based on the model, cutting technology, and included functionalities. Basic models suitable for small-scale production or patch cord manufacturing can start around \$3,000 to \$5,000, while high-end fully automated machines with advanced features like precision length measurement, automatic winding, and multi-core cutting can reach \$10,000 to \$15,000 or more .

Factors Affecting Price

- **Automation Level:** Fully automatic machines with touch-screen interfaces, programmable cutting lengths, and automatic feeding/winding systems are more expensive than semi-automatic or manual models .
- **Cutting Technology:** Machines using rotary blades, heated blades, or ultrasonic cutting for precise, burr-free cuts may cost more due to specialized components .
- **Production Capacity:** Machines designed for high-speed, large-volume production with adjustable feed rates and high accuracy typically command higher prices .
- **Cable Compatibility:** Machines capable of handling multiple cable types (loose-tube, tight-buffered, flat, ribbon) and diameters are generally more expensive .
- **Additional Features:** Integrated winding, length measurement, and protective han...
