

Price of Fiber Optic Broken Wire Detector

Article Overview

Fiber optic broken wire detectors (visual fault locators) typically range from \$50 to \$400 depending on features and multifunction capabilities.

Basic Visual Fault Locators

Entry-level fiber optic detectors, designed for locating breaks, bends, and faults in fiber cables, usually feature a 650nm red laser and support standard fiber connectors. These devices are compact, portable, and ideal for field technicians or construction workers. Prices for these basic VFLs generally range from \$50 to \$150. For example, Berlin Lasers offers professional fiber optic detectors suitable for onsite testing and fault tracing at a low cost, emphasizing fast and accurate fault location . Amazon also lists mini light pen VFLs for around \$60-\$100, with universal adapters and rechargeable batteries .

Advanced and Multifunction Devices

More sophisticated models combine multiple functions such as optical power meters, LAN cable testers, tone generators, and wire mapping along with visual fault location. These multifunction testers are designed for network engineers and technicians who need a single device for comprehensive diagnostics. Prices for these devices typically range from \$200 to \$400. For instance, the NOYAFA NF-8508 is a 9-in-1 multifunction tester that includes a VFL, optical power meter, and cable tracing capabilities, offering high versatility at a competitive price . Lanshack also offers high-powered VFLs capable of detecting faults up to 30km, with rugged aluminum construction, priced in the higher range of professional tools
