

Price of Horizontal Fireproof Cable Trays

Article Overview

Fireproof horizontal cable trays typically range from \$20 to \$150 per 2.4-meter section, depending on material, type, and supplier.

Pricing Overview

The cost of fireproof cable trays varies based on material, design, and fire rating:

- Hot-dip galvanized steel ladder trays: Commonly used for heavy-duty applications, prices are generally around \$20–\$50 per 2.4-meter section for standard sizes and load capacities .
- Aluminum or stainless steel trays: Lightweight and corrosion-resistant, these can cost \$50–\$100 per section, with higher prices for premium stainless steel or specialized fireproof coatings .
- Perforated or wire mesh trays: Offer better airflow and flexibility, typically priced \$30–\$80 per section, depending on material and load rating .
- Copper trays: Premium option due to high conductivity and corrosion resistance, often exceeding \$100 per section, suitable for critical circuits .

Factors Affecting Price

- Material: Steel is generally cheaper than aluminum or stainless steel, while copper is the most expensive.
- Fire Rating: Trays certified for 60, 90, or 120 minutes of fire resistance may cost more due to additional coatings or mineral-insulated cable compatibility .
- Tray Type: Ladder, perforated, wire mesh, and solid-bottom trays differ in manufacturing complexity and airflow characteristics, influencing cost
