

Price of Nepalese Ladder Cable Trays

Article Overview

The price of ladder cable trays in Nepal varies depending on material, size, thickness, and finish, typically requiring direct inquiry with local manufacturers for exact quotes.

Overview of Ladder Cable Trays in Nepal

Ladder cable trays are widely used in Nepal for industrial, commercial, and utility applications to support and protect electrical cables. They are available in various materials including galvanized steel, stainless steel, aluminum, and powder-coated steel. Standard lengths are usually 2500mm, with thickness ranging from 1.6mm to 3mm, and heights from 40mm to 100mm. Widths can vary from 100mm to 1000mm, depending on the load and cable requirements.

Factors Affecting Price

- **Material:** Stainless steel and aluminum trays are generally more expensive than pre-galvanized or powder-coated steel due to corrosion resistance and durability.
- **Finish:** Options like hot-dip galvanization, powder coating, or painting influence cost, with hot-dip galvanization typically being the most expensive.
- **Size and Thickness:** Larger widths, higher heights, and thicker metal increase the price due to higher material usage.
- **Type:** Ladder trays can be welded or bolt-and-nut types, with welded trays often costing more due to manufacturing complexity.
- **Customization:** Custom sizes, colors, or patterns may add to the cost, especially for industrial or large-scale projects.
