

Price of Trough-type Cable Trays for Roads and Bridges

Article Overview

Trough-type cable trays for infrastructure projects typically range from \$50 to \$300 per meter depending on material, load capacity, and customization, with exact pricing available via supplier quotes.

Overview

Trough-type cable trays are widely used in roads, bridges, and other infrastructure projects to support and protect electrical, communication, and power cables. They are designed to provide moderate cable protection and ventilation, combining features of ladder and solid-bottom trays, making them suitable for both elevated and underground installations .

Material Options and Cost Factors

- **Steel (Galvanized or Powder-Coated):** Offers high strength and durability, suitable for heavy-duty applications. Hot-dip galvanization improves corrosion resistance for outdoor or bridge installations . Prices are generally higher due to material and protective coatings.
- **Aluminum:** Lightweight and corrosion-resistant, ideal for installations where weight is a concern. Aluminum trays are often slightly more expensive than standard steel but easier to handle and install .
- **Fiberglass/GRP/GRC:** Non-conductive and highly resistant to chemical and environmental exposure, suitable for harsh or corrosive environments. GRP or GRC troughs are often used in bridges or roadside installations where durability and safe...
