

Price of a wall-mounted beam splitter box

Article Overview

The installation price of a wall-mounted beam splitter box typically ranges from \$150 to \$500, depending on the box type, fiber count, and labor complexity.

Hardware Costs

Wall-mounted fiber optic splitter boxes, such as the Abalone FTTH terminal box, support 1×2, 1×4, 1×8, and up to 1×16 PLC splitters, with capacities up to 24 fibers . These boxes are made of durable ABS or PC+ABS materials, often with water-resistant and lockable designs, and include installation kits for wall mounting . Prices for the boxes themselves vary:

- Basic indoor wall-mounted box (1-4 fibers): \$50-\$120
- Higher-capacity boxes (8-16 fibers, modular design): \$150-\$300
- Specialized beam splitters (fiber beam splitters with 50/50 or 70/30 ratios): \$100-\$400 depending on optical quality and coating

Installation Costs

Installation involves mounting the box on a wall, securing the fiber cables, splicing fibers, and connecting adapters. Factors affecting cost include:

- Labor rates: Typically \$50-\$100 per hour for certified fiber optic technicians.
- Installation time: Simple wall-mount boxes may take 1-2 hours; complex multi-splitter setups can take 3-5 hours.
- Additional materials: Mounting brackets, cable management, and protective cond...
