

Price of electrical distribution box in bedroom

Article Overview

The cost of a bedroom electrical distribution box typically ranges from £10 to £450, depending on type, material, and features.

Price Overview

For standard residential use, basic plastic distribution boxes or apartment switchboards generally cost between £10 and £50 for the unit alone, suitable for embedding in walls or surface mounting . These boxes are designed to house circuit breakers and provide protection for individual circuits in a bedroom or small apartment . For more advanced or wall-mounted units, including those with integrated smart monitoring, surge protection, or modular expansion capabilities, prices can rise to £100-£450, especially if the box is intended to replace an older fuse box or accommodate additional circuits . Installation complexity, material quality (plastic vs. metal), and compliance with local electrical codes can further influence the total cost .

Factors Affecting Cost

- Material: Plastic boxes are cheaper and sufficient for indoor use, while metal or weather-resistant boxes are more expensive .
- Capacity: Boxes with more circuits or higher amperage ratings cost more .
- Features: Smart monitoring, modular expansion, and surge protection increase the price
