

Price of left-side vertical bend for cable trays

Article Overview

The price of a left-side vertical bend for cable trays typically ranges from \$50 to \$200 per unit, depending on material, size, and manufacturer.

Overview

Left-side vertical bends are essential fittings used to route cable trays vertically while maintaining organized cable management. They are available in various materials such as galvanized steel, aluminum, and fiberglass, each affecting durability, corrosion resistance, and cost. These bends are compatible with ladder, solid-bottom, and wire mesh cable trays, and are often used in industrial, commercial, and utility installations.

Price Factors

- **Material:** Steel bends are generally more affordable and robust, aluminum bends are lightweight and corrosion-resistant, while fiberglass bends are non-conductive and suitable for specialized environments.
- **Size and Load Capacity:** Larger bends designed for heavy-duty cable trays cost more due to higher material usage and structural requirements.
- **Manufacturer and Region:** Prices vary by supplier and shipping location. Suppliers like Maheshwari Electricals, Profab Engineers, and Site Pro offer quotes based on specifications.
- **Adjustable vs Fixed:** Adjustable vertical bend kits, which allow bends up to 180°, may be priced higher than fixed-angle bends due to their flexibility
