

Price quote for self-supporting 24-core optical fiber cable

Article Overview

A 24-core fiber optic cable typically costs between \$1.20 and \$3.50 per meter, depending on fiber type, construction, and application.

Price Range

- Single-mode 24-core cable: \$1.50 to \$3.50 per meter, generally used for long-distance communication due to low signal attenuation .
- Multimode 24-core cable: \$1.20 to \$3.00 per meter, suitable for shorter distances such as within buildings or campuses .

Factors Affecting Cost

- Fiber Type: Single-mode fibers are more expensive than multimode fibers because of higher manufacturing precision and superior performance .
- Cable Construction:
 - Tight-buffered cables: Common for indoor use, lighter and less expensive.
 - Loose-tube cables: Ideal for outdoor or underground installations, offering protection against moisture and temperature changes.
 - Armored cables: Include a metal layer for mechanical protection, increasing cost, especially for high-risk areas .
- Installation Environment: Indoor riser-rated cables cost less than plenum-rated cables for air-handling spaces. Direct burial or underground installations are more expensive than aerial or indoor runs
