

Price range of galvanized cable trays for optical cables

Article Overview

Galvanized cable trays for optical cables typically range from \$15 to \$50 per meter, depending on size, load capacity, and galvanization type.

Price Range and Factors

The cost of galvanized cable trays varies based on several factors:

- **Material and Finish:** Pre-galvanized steel trays are generally less expensive, while hot-dipped galvanized trays offer higher corrosion resistance and cost more .
- **Tray Type and Size:** Ladder, perforated, or solid-bottom trays differ in price. Widths typically range from 50mm to 600mm, and lengths are commonly 1m or 3m . Larger or heavy-duty trays designed for high cable loads are at the higher end of the price range .
- **Thickness and Load Capacity:** Standard thicknesses are around 1.5mm, with heavier trays weighing 2kg/m or more, which increases cost .
- **Accessories:** Couplers, bends, risers, and lids are sold separately and can add to the overall system cost .

Supplier Examples

- Direct Channel offers light, medium, and heavy-duty galvanized trays with pre-galvanized or hot-dipped finishes, suitable for indoor and outdoor optical cable installations
