

Pricing of optical cables for overhead iron tower lines

Article Overview

OPGW (Optical Ground Wire) cables for overhead iron tower lines typically range from \$10 to \$50 per meter depending on fiber count, materials, and design specifications.

Pricing Overview

The cost of OPGW cables varies significantly based on several factors:

- **Fiber Count:** Common configurations include 12, 24, 36, 48, and 72 fibers. Higher fiber counts increase the price due to additional materials and manufacturing complexity. For example, a 24-core cable is generally less expensive than a 72-core cable .
- **Material Composition:** OPGW cables are usually made with an aluminum-clad steel core or aluminum alloy. Aluminum alloys are lighter and stronger but more expensive than standard aluminum-steel combinations .
- **Voltage Rating and Structural Design:** Cables designed for high-voltage lines (110kV-500kV) or extreme weather conditions may cost more due to enhanced load-bearing and durability requirements .
- **Market Factors:** Raw material prices (aluminum, steel) and overall demand can cause price fluctuations .

Typical Price Ranges

- **12-48 core OPGW cables:** Factory prices generally range from \$10 to \$50 per met...
