

# Protection level of optical cable terminal box

## Overview

IP65 and IP68 ratings define the level of protection a fiber termination box offers against dust and water. The IP65 rated fiber optic termination boxes, such as compact 8-port models, excel in both indoor and outdoor settings by shielding connections from. FTB-SC8-WOPA type fiber optic terminal box is designed for FTTx application, which is cable to meet at least 8 users requirements. It can help splicing, splitting, storage and management with suitable space. With a total enclosed structure and made of PC+ABS material, it is wet-proof, water-proof, dust-proof, and anti-aging, with a protection level up to IP68. Applying our proven design found in the TNCN product line, we are able to provide long-term highspeed junctions. Indoor FTTH Fiber Distribution Box, optical fiber distribution box is used for the fusion splicing, splitting, wiring transmission, and other functions of the optical transmission terminal. It is necessary equipment in network.
