

Quotation for Low-Loss Project of Fiber Optic Hybrid Cable

Article Overview

A low-loss fiber optic hybrid cable project typically ranges from \$250-\$1,500 per drop or connection, depending on fiber type, cable length, installation complexity, and hybrid features.

Cost Components

- Cable and Passive Infrastructure
 - Fiber Type: Single-mode (OS1/OS2) for long-distance, low-loss backbones; multimode (OM3/OM4/OM5) for shorter, high-bandwidth applications .
 - Hybrid Features: Integration of copper for power delivery, armored jackets, UV-resistant layers, and shielding for EMI protection .
 - Pricing: Per drop or connection, costs range from \$250-\$1,500 depending on fiber type, number of fibers, and cable construction .
- Civil Works and Installation
 - Includes trenching, conduit installation, restoration, and labor .
 - Civil works typically account for 60-70% of total project cost in FTTH deployments .
 - Armored or outdoor-rated hybrid cables reduce installation complexity by consolidating multiple runs into a single cable, lowering overall labor and conduit costs .
- Testing and Loss Budget
 - Insertion Loss: Single-mode fiber typically experiences 0.4-0.5 dB/km at 1550 nm; multimode fiber 3 dB/km at 850 nm
