

Quotation for Modular Data Center IP54

Article Overview

Modular Data Centers with IP54 rating are available from multiple vendors, offering weatherproof, scalable, and pre-integrated solutions; quotes can be obtained by contacting the manufacturers directly.

Overview of IP54 Modular Data Centers

An IP54-rated modular data center provides protection against dust ingress and water splashes, making it suitable for outdoor or semi-exposed environments. These units are prefabricated, factory-tested, and scalable, allowing rapid deployment and integration of power, cooling, networking, and security systems. They are designed for high-density computing, AI workloads, and edge deployments, with modular expansion capabilities to match growing infrastructure needs.

Key Features

- **Weatherproof Enclosure:** IP54 rating ensures protection against dust and water splashes, suitable for outdoor deployment.
- **Scalable Power and Cooling:** Integrated UPS, switchgear, and cooling systems allow incremental expansion.
- **Rapid Deployment:** Factory pre-integration reduces on-site installation time, often cutting deployment timelines by 40% or more compared to traditional builds.
- **Customizable Design:** Vendors offer tailored configurations for HVAC, power distribution, network architecture, and security, including RF shielding and compliance with TEMPEST or IL4-IL6 standards.
- **Durability and Maintenance:** Prefabricated modules are built for long-term operation.
