

Recommended French Fluorescence Spectrometer

Article Overview

Top recommended fluorescence spectrometers in France include HORIBA, JASCO FP-8x50 series, and Shimadzu RF-6000, offering high sensitivity, 3D scanning, and versatile applications for research and analytical labs.

HORIBA Fluorescence Spectrometers

HORIBA offers a wide range of steady-state and time-resolved fluorescence spectrometers, including modular systems and microscope-based solutions. Their instruments support A-TEEM™ technology for simultaneous absorbance, transmittance, and excitation-emission matrix acquisition, making them suitable for materials science, life sciences, water analysis, and forensics. HORIBA systems are highly customizable, allowing selection of components, software, and accessories to match specific research needs and budgets .

JASCO FP-8x50 Series

The JASCO FP-8x50 series provides high-precision spectrofluorimeters for biomolecular studies, environmental monitoring, and luminescent materials research. Key features include:

- Variable bandwidths down to 1 nm for excitation and emission
- High-speed scanning for rapid 3D EX/EM mapping
- Powerful 3D data processing software...
