

Remote monitoring type of data center racks for edge computing

Overview

Rack-based modular systems bring together IT racks, cooling units, service enclosures, and monitoring tools into a single, cohesive package. Designed for edge locations and distributed IT applications, these compact systems enable IT teams to deploy remote infrastructure with. ArcTiv Micro Data Centers include all-in-one rack, power, cooling and monitoring solutions to manage your Edge-Servers in on-premise or remote locations. This system, designed to be installed and online quickly, is available in eight pre-built standard options with four rack sizes and two voltages. Legrand offers intelligent, integrated edge computing solutions that simplify your remote IT infrastructure and management needs by offering flexibility and scalability through a depth of physical infrastructure, power and network connectivity products.
