

Router directly connected to China Mobile fiber optic cable

Article Overview

China Mobile provides home broadband services using advanced fiber optic cables and routers, including traditional single-mode and next-generation hollow-core fiber technologies.

Home Broadband and Routers

China Mobile offers Fibre to the Home (FTTH) services, which include high-speed internet, Wi-Fi, and home phone bundles. Customers typically receive a router provided by China Mobile as part of the installation, which supports the fiber connection and enables Wi-Fi distribution throughout the home. These routers are designed to integrate seamlessly with China Mobile's optical network, ensuring stable connectivity and high-speed performance.

Fiber Optic Cable Procurement

China Mobile conducts large-scale centralized procurement of optical cables, sourcing from major manufacturers such as YOFC, Hengtong, ZTT, and FiberHome. For the 2025/2026 period, China Mobile awarded contracts for 98.8 million fiber-kilometers, with the top four suppliers securing 60% of the tender. The cables include loose-tube and single-mode fibers, designed for long-distance and high-capacity transmission, with pricing reflecting both quality and supplier reliability.
