

SC dual-port fiber optic information panel

Article Overview

SC dual-port fiber optic panels provide a compact, organized solution for terminating and managing fiber optic connections using SC connectors.

Overview

SC dual-port fiber optic information panels are designed to terminate, organize, and protect fiber optic cables in residential, commercial, or data center environments. They typically feature two SC/UPC ports, allowing for simple duplex connections, and are compatible with single-mode or multimode fibers depending on the panel configuration (L-CFTB-E-SC, for example, comes with single-mode pigtails ready for splicing) .

Types and Mounting Options

- **Wall-Mounted Panels:** Compact panels suitable for indoor installations, often with a single door for easy access. They are ideal for end terminations of fiber runs in smaller networks or office environments .
- **Rack-Mounted Panels:** Panels like the FPP296 series are 19-inch rack-mountable, typically 2U in height, and can accommodate multiple SC duplex adapters, supporting up to 96 fibers in a space-saving design. These panels often include slidable trays for easier installation and maintenance, as well as removable top covers .

Features

- **SC Duplex Adapters:** Provide secure mating for SC connectors, ensuring low insert...
