

STST Single-mode Fiber Optic Patch Cord Price

Article Overview

ST single-mode fiber optic patch cords typically range from \$5 to \$30 per meter, depending on length, quality, and vendor.

Overview

ST single-mode fiber optic patch cords are designed for long-distance, high-speed networking using OS2 9/125 fiber, which supports distances up to 10 km at 1310 nm and 30–40 km at 1550 nm . They feature ST duplex connectors with 2.5 mm ferrules, often in a yellow jacket for single-mode identification, and are suitable for indoor and outdoor applications . Common lengths range from 1 meter to 10 meters or more, with longer cables generally costing more.

Price Factors

- Cable Length: Shorter cables (1–3 meters) are usually priced around \$5–\$10, while longer cables (10 meters or more) can reach \$20–\$30 or higher per unit .
- Connector Type: Standard ST to ST connectors are common, but hybrid connectors (e.g., LC to ST) may slightly increase the price .
- Fiber Quality: High-quality Corning OS2 fiber or low-loss, high-bandwidth cables may cost more due to better signal fidelity and durability .
- Jacket and Rating: Plenum-rated (OFNP) or riser-rated (OFNR) jackets for fire safety and indoor/outdoor use can affect pricing .
- Vendor and Warranty: Prices vary by supplier; some vendors offer lifetime warranties or bulk discounts
