

Selling price of optical modules

Overview

In 2024, global sales of optical modules were estimated at 88-117 million units, with an average price range of approximately \$150-200 per unit. 8% during the forecast period 2025-2031. These components form the core of optical transceivers, converting electrical signals to optical signals (and vice versa) for telecommunications and data center applications. Optical module demand is being pulled in two directions at once, faster bandwidth for dense networks and tighter constraints on power, security, and lead times. 5 billion in 2024 and is estimated to reach USD 8. The Optical Modules Market encompasses the design, manufacturing, and deployment of compact, high-performance devices that facilitate. The global optical modules market was valued at \$14.
