

Setting speed limits on fiber optic routers

Overview

To control bandwidth in a router, follow these steps: Sign in to the router's admin panel. Go to the Bandwidth Control section. Tick. The TP-Link Speed Limit (Bandwidth Control) feature lets you throttle internet speed on a per-device basis — useful for preventing one device from hogging bandwidth or keeping connections fair for everyone in the household. You can set independent download and upload limits for each connected. Knowing the ideal internet speed for your requirements, how to restrict internet speed on your router, and how to set internet speed limit on router can enhance your online experience. In this guide, we'll show you actionable gains from better placement (high, central, open), a clean band split (5 GHz for work/gaming, 2.4 GHz for IoT), smarter channels, and QoS so real-time traffic. Fiber optic internet keeps getting faster. You can upgrade to 1 gigabit speed, 2 gigabit speed and now even 7 gigabit speed—that's more than 25 times faster than the average broadband connection in the U.
