

Side wall cable tray support styles

Article Overview

Side wall cable tray supports include wall-mounted brackets, triangular supports, J-bolt kits, and adjustable shelf brackets, each designed to secure trays to walls while accommodating different tray sizes and loads.

Wall-Mounted Brackets

Wall-mounted brackets are the most common side wall support. They attach directly to the wall and provide a stable base for cable trays. Typically U-shaped, one side connects to the wall while the other supports the tray. These brackets can be used for horizontal or vertical tray runs and are suitable for light to medium cable loads . Examples include standard wall angle supports and shelf brackets for 12-24 inch wide trays .

Triangular Wall Supports

Triangular or gusseted wall supports provide additional rigidity for heavier cable loads or longer spans. They are often used in industrial or data center installations where trays carry multiple layers of cables or large power conductors. These supports distribute weight efficiently and reduce sagging .

J-Bolt Kits

J-bolt kits are used to fasten ladder or tray sections to wall-mounted brackets. They allow secure attachment while accommodating minor adjustments in alignment. These kits are commonly paired with wall angle supports or triangular brackets for...
