

Single-membrane patch cord fiber

Overview

Utilizing bare fiber without costly metalization, and a proprietary sealing process, these patchcords feature a rugged hermetic feedthrough that can be soldered into an opto-electronic package using standard tin/lead solders. We offer high-quality single-mode patch cables. Narrow key FC/PC connectors on both ends are standard and all variations of connectors are available on special orders. These cables feature either Ø3 mm protective jackets. Each patch cable includes two protective caps that shield the ferrule ends. Thorlabs offers single mode fiber optic patch cables with a variety of connector options, including FC/PC, FC/APC, and hybrid FC/PC to FC/APC and FC/PC to SMA. Available in OS1 and OS2 9/125 µm variants, they are 100% factory tested and come in simplex or duplex formats. The Corning Quick Connect program offers a 2-day lead time for our EDGE Uniboot Jumpers, with a 90% delivery guarantee.
